K-LAB: LIVING & DESIGN FURNITURE

Porcelain stoneware is a material suitable for various types of customisation, and this may make all the difference when furnishing either a residential or a commercial interior.

The prestige of any location can be enhanced with unique design features, styled to measure in continuity with the materials used for the floors and walls.

Tables, desks, reception counters, benches, flower tubs, blocks and shelves are just some examples of products which can be created thanks to our K-LAB technical department. A unique way of giving your bespoke interior design project harmony, class and elegance.

K-LAB: COUNTERTOPS

Porcelain stoneware is one of the most widely used materials for kitchen floor and wall coverings. Its characteristics make it an ideal material in terms of both appearance and technical properties. Immune to time, it is hygienic, waterproof and resistant to impacts, scratches, thermal shock and chemicals.

OUR K-LAB OFFICE IS ABLE TO DESIGN MATERIALS TO MEASURE, WITH A LARGE VARIETY OF POSSIBLE PROCESSING TECHNIQUES

Our products are cut to size to meet the customer's design requirements. All this enables the construction not only of unique kitchen countertops and tables but also of vertical surfaces for drawers and unit or pantry doors.
