Design: *CEADESIGN Studio*

The taps collection, made of AISI 316L stainless steel, is available with single handle, dual handle and thermostatic mixers.

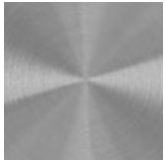

Created to satisfy every possible design requirement, MIL0360 represents the iconic product with a sixties design, a transversal interpreter of modern taps and fittings systems. The particularly sober cylindrical shape adapts to any type of architecture.

A wide choice of remote controls and shower sets allows endless combinations with FREE IDEAS outlets: spouts, shower heads and hand showers allow you to configure and customize the product.

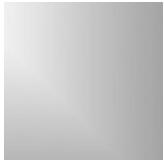

All the products of the MIL0360 collection are available in the standard satin and polished finish and in all CEA's special finishes (Black Diamond, Bronze, Copper and Light Gold) guaranteeing an ecological and biocompatible solution.

The taps collection, made of AISI 316L stainless steel, is available with progressive, dual handle and thermostatic mixers.

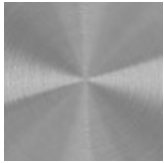

Inspired by the pure and archetypal forms of the circle. Designed to ensure maximum compositional freedom thanks to the ductility of the collection, GIOTTO is an expression of aesthetic and functional consistency.

A wide choice of remote controls and shower sets allows endless combinations with FREE IDEAS outlets: spouts, shower heads and hand showers allow you to configure and customize the product.

All the products of the GIOTTO collection are available in the standard satin and polished finish and in all CEA's special finishes (Black Diamond, Bronze, Copper and Light Gold), guaranteeing an ecological and biocompatible solution. GIOTTO can also be personalized with handles in 4 different wood essences: Canaletto Walnut, Burma Teak, Oak and Wenge. Independently of the choice of wood, the spout and the cover plate always remain in stainless steel satin, polished and Black Diamond finish. These taps are completed with the GIOTTO accessories collection, in which the shape of the circle is repeated several times, emphasizing the concept of perfection.

The taps collection, made of AISI 316L stainless steel, is available with single handle, dual handle and thermostatic mixers.

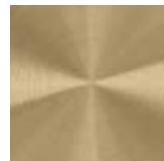

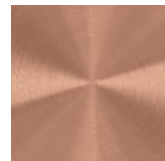

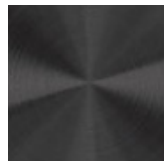

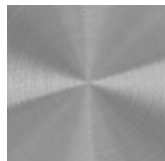

Characterized by the 30 mm diameter cylindrical body, INNOVO represents an evolution of traditional design. Lightened and made thinner, INNOVO stands out for its absolute elegance, embellished by a particularly ergonomic handle, made with a laser cutting technique. Innovative the washbasin spout of the single-hole mixer, which by turning on itself reduces the flow rate, allowing the user to drink or rinse his teeth with extreme simplicity: it is a utility model.

A wide choice of remote controls and shower sets allows endless combinations with FREE IDEAS outlets: spouts, shower heads and hand showers allow you to configure and customize the product.

All the products of the INNOVO collection are available in the standard satin and polished finish and in all CEA's special finishes (Black Diamond, Bronze, Copper and Light Gold) guaranteeing an ecological and biocompatible solution.

CROSS

NO.BA Studio

Design: Natalino Malasorti

The taps collection, made of AISI 316L stainless steel, is available with progressive, dual handle and thermostatic mixers.

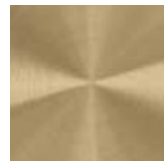

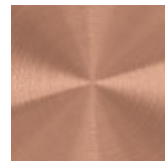

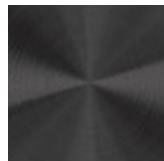

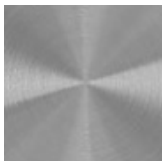

Reinterpretation of the Greek cross, CROSS is characterized by the forging of the handle rigorously made on a lathe with numerical control machines. The unique and tapered body of the handle ends at the upper part into a surface that is coplanar to the one that carries it, giving linearity and cleanliness to the design. CROSS, while requiring sophisticated processing, guarantees the user a particular ergonomics.

A wide choice of remote controls and shower sets allows endless combinations with FREE IDEAS outlets: spouts, shower heads and hand showers allow you to configure and customize the product.

All the products of the CROSS collection are available in satin and polished finish and in all CEA's special finishes (Black Diamond, Bronze, Copper and Light Gold) ecological and biocompatible.

Design: Natalino Malasorti

The taps collection, made of AISI 316L stainless steel, is available with progressive, dual handle and thermostatic mixers. Created with the intent of the designer to "clean the superfluous" and tell only the "essential": a cylinder of 60 mm as a handle for temperature control, another of only 18 mm carries water. No additional elements (the collection does not include the use of rosettes), a single material, steel. The main feature of the collection is the composition: the spout mounted/installed in line with the handles are aligned to the lower edge of the remote control, that gives to OPUS a deliberately asymmetric appearance. A wide choice of remote controls and shower sets allows endless combinations with FREE IDEAS outlets: spouts, shower heads and hand showers allow you to configure and customize the product. All the products of the OPUS collection are available in the standard satin and polished finish and in all CEA's special finishes (Black Diamond, Bronze, Copper and Light Gold) guaranteeing an ecological and biocompatible solution.

The taps collection, made of AISI 316L stainless steel, is available with progressive, dual handle and thermostatic mixers.

A modern reinterpretation of the three-lobed handle, ZIQQ evokes the stepped constructions of the ancient Mesopotamian temples known as ZIQQURAT, symbol of communication between heaven and earth. With its linear but dynamic design, ZIQQ is characterized by its asymmetry and variable section.

A wide choice of remote controls and shower sets allows endless combinations with FREE IDEAS outlets. All the products of the ZIQQ collection are available in satin and polished finish and in all CEA's special finishes guaranteeing an ecological and biocompatible solution. ZIQQ can also be personalized with handles in 4 different WOOD ESSENCES available in satin, polished and Black Diamond finish. These taps are completed with the ZIQQ accessories collection.

BAR

NO.BA Studio

Design: Natalino Malasorti

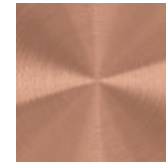

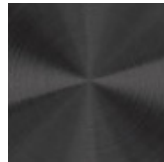

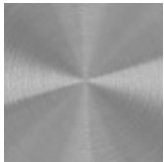

The taps collection, made of AISI 316L stainless steel, is available with progressive, dual handle and thermostatic mixers. Inspired by essential and timeless geometries, BAR combines the formal rigor of the handle and the squared spout with the softness of the water flow controlled by an aerator, to which it is possible to add a flow reducer.

A wide choice of remote controls and shower sets allows endless combinations with FREE IDEAS outlets: spouts, shower heads and hand showers allow you to configure and customize the product.

All the products of the BAR collection are available in the standard satin and polished finish and in all CEA's special finishes (Black Diamond, Bronze, Copper and Light Gold) guaranteeing an ecological and biocompatible solution. BAR can also be personalized with handles in 4 different WOOD ESSENCES: Canaletto Walnut, Burma Teak, Oak and Wenge. Independently of the choice of wood, the spout and the cover plate always remain in stainless steel satin, polished and Black Diamond finish.

DUET

NO.BA Studio

Design: Mario Tessarollo / Daniela Lorato

The taps collection, made of AISI 316L stainless steel, is available with single handle, dual handle and thermostatic mixers.

The circle/square dualism that characterizes DUET is emphasized by the satin finish of the circle that constitutes the tap handle, and by the polished finish of the square detail. The glossy square, set in the handle, gives the product three-dimensionality and preciousness. The refined design of DUET has been worth the ornamental model.

A wide choice of remote controls and shower sets allows endless combinations with FREE IDEAS outlets: spouts, shower heads and hand showers allow you to configure and customize the product.

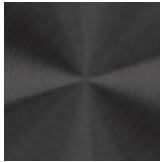

All the products of the DUET collection are available in the standard satin finish with polished detail and in all CEA's special finishes (Black Diamond, Bronze, Copper and Light Gold) guaranteeing an ecological and biocompatible solution. These taps are completed with the DUET accessories collection.
